

A little bit about Constructing Excellence – more information can be found on [www.constructingexcellence.org.uk](http://www.constructingexcellence.org.uk)

## About Constructing Excellence

***Constructing Excellence is the single organisation charged with driving the change agenda in construction.***

***We exist to improve industry performance in order to produce a better built environment.***

***We are a cross-sector, cross-supply chain, member led organisation operating for the good of industry and its stakeholders.***

## About Constructing Excellence

Constructing Excellence is a platform for industry improvement to deliver better value for clients, industry and users through collaborative working.

We bring together informed intelligent clients with leading industry players, universities and other stakeholders to collaborate on:

- Innovation and research
- Benchmarking and demonstrations
- Knowledge transfer and learning
- Networking and thought leadership.

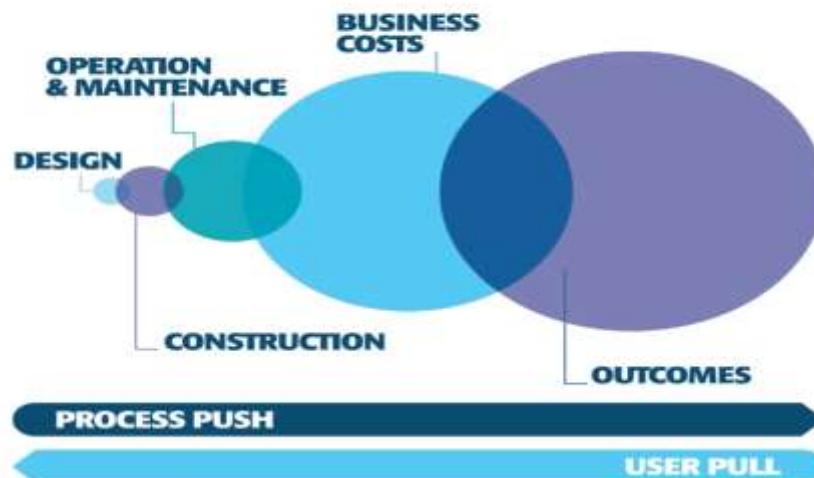

## Construction 2025

We support the government-industry strategy Construction 2025 and accelerate the speed at which engaged players achieve the targets for improvement.

## Understanding value

The value of good built facilities in use for clients and end users far outweigh the costs of design, construction and operation. The precise ratios differ for every client and every facility, but understanding the business case in this way at the outset of a project is vital for success.

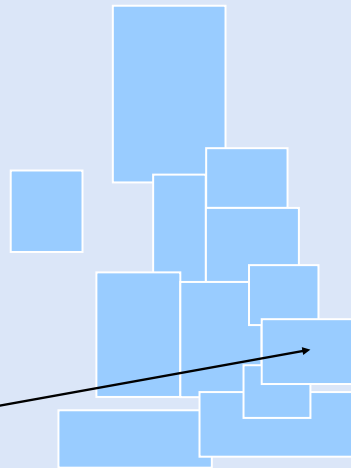

## National & International Organisation

12 Regional Partners
